

Visit Montana!

If you have been a nature lover all your life and you are looking for your next great adventure, then one of the best holiday destinations for you would be the beautiful state of Montana. Known as the 'Big Sky country' for its vast open, blue skies, Montana is a land for adventure, peace and tranquility.

Why visit?

Montana features spectacular snow peaked mountains, vast prairie lands, and beautiful forests. Wild rivers and streams are filled with rainbow trout and other fishes. An abundance of elk, antelope, and other wildlife are found in Montana. It's the kind of place that remains with you after you've left its beautiful wilds behind.

Where is Montana?

Montana is located in the north Western United States. The land locked state shares a 545-mile (877 km) border with three Canadian provinces: British Columbia, Alberta, and Saskatchewan. It borders North Dakota and South Dakota to the east, Wyoming to the south and Idaho to the west and southwest.

What is the Climate like?

Although it can get extremely cold in Montana, due in part to Montana's northern location, there is a great deal of diversity in state's weather. In fact, Montana is seldom consistently cold or hot. The state's low humidity translates into temperatures that are neither oppressively hot nor cold. Average daytime temperatures vary from 28 degrees in January to 84.5 degrees in July. Rainfall is generally light, with most falling between May and July. Average rainfall for the western part of the state is 18 inches a year; 13 inches for the east. During July
