

Green - Year 5 - Answers

1)

- 2) a) $\frac{4}{5} = \frac{8}{10}$ I looked at the denominators. As $5 \times 2 = 10$, I knew I needed to multiply the numerator by 2.
- b) $\frac{6}{18} = \frac{2}{6}$ I looked at the denominators. As $18 \div 3 = 6$, I knew I needed to divide the numerator by 3.
- c) $\frac{2}{3} = \frac{10}{15}$ I looked at the numerators. As $2 \times 5 = 10$, I knew I needed to multiply the denominator by 5.
