Solve division word problems  
Maths worksheets from [urbrainy.com](http://urbrainy.com)

Have a go at these word problems.  
You will need to use division to  
work them out.

1. There are 30 children in a class. I have 180 crayons.  
How many will each child get if I share them equally?
2. Ten pairs of trainers cost £550.  
How much would one pair cost?
3. A fairground ride can hold 160 people. It is only a quarter full.  
How many people are on the ride?
4. Rachel shared out 48 sweets between her four friends.  
How many did they get each?
5. George managed to write his signature 120 times in four minutes.  
How many times did he write his signature in 1 minute?
6. There were 5 children on the hike. They took 45 sandwiches with  
them. How many sandwiches would each child get?
7. James has 55 stickers in his book divided equally on 11 pages.  
How many are there on each page?
8. Olivia has 32 apples stored in boxes. If there are 4 apples in a box,  
how many boxes does she have?
9. Sam shared 50 sweets equally between his four friends.  
They got 12 each. How many were left over?
10. Tom has 500 pence in his piggy bank.  
How many pounds does he have?
