

## Example letter to Pete

Friendship forest  
Far, Far Away  
England

Dear Pete,

I am writing to persuade you to stop destroying the forest so that we can all live together safely.

In my opinion you are not only destroying the habitats of animals but you are also ensuring they have nothing to eat!

If you continue to take down the trees the squirrels will have nowhere to live and the birds will have nowhere to build their nests. Surely you can see that we need the trees for shelter.

I strongly feel that that you have not considered the animals that live on the forest floor either. The hedgehogs and the foxes need the leaves and other forest debris to create their homes. Clearly paving over the entire forest is not going to benefit anyone!

Enough is enough! Think about your friends and neighbours because if you continue they will have no home.

I hope you consider this letter

The Forest Keeper  
On behalf of all the animals.
