

Model Maya Temple

Today I would like you to plan your model and start preparing resources to build it on Friday. You will need to look closely at the building you are going to base your model on and decide the materials you will use for each element. It can be any size, inside or out, permanent or temporary, the choice is yours. It may help to do a sketch of your model, or have an image ready to look at whilst building your model. Here are some ideas to get you started:

Cake, Lego, toilet rolls, used toilet rolls, books, logs, wood, plastic cups, recyclable items, cardboard boxes, cardboard, toothpicks, coins etc.
