Percentage Spider

Author: James Monaghan

Calculate the percentage of the number.

The screenshot shows the 'Percentage Spider' game interface. At the top left, there is a slider labeled 'a = 520' and an input box labeled 'answers'. The main part of the interface is a spider with the number '520' in its body. The spider's legs are labeled with percentages: 10%, 100%, 50%, 25%, 1%, 15%, 2.5%, and 5%. A small icon in the bottom right corner indicates a full-screen mode.
